Integrated Communication for Business

Integrated software solutions for Manufacturing

>>

cellular-solutions**.co.uk**

When you trust us with your business, you will receive the absolute best advice on how to implement your software and maximise efficiencies and cost savings.

We have extensive sector experience in implementing bespoke solutions for a wide range of SMEs in the manufacturing sector. And coupled with unrivalled levels of customer care and service through implementation and beyond, our recommended solutions will transform the way you operate, helping you achieve your objectives, growth and profit.

- Sage 50 Manufacturing
- Sage 200 Manufacturing
- Sage ERP X3

Have you ever considered the difference between what you're spending and the value you're getting for your money? When your software and systems are completely integrated into your business processes and procedures, life becomes easier and your business performs better.

Your business is important to us because we recognise how vital continual improvements are to YOU and how management software will dramatically improve your bottom line.

With a version specifically written to provide solutions for your needs, Sage 200 Manufacturing enables businesses to automate their complex processes and batch or one off manufacture.

It gives you the information needed to manage and control your business more effectively, maintain productivity and increase customer satisfaction and profitability. It enables you to track supply chain activities in detail, end-to-end, so you can maintain maximum productivity.

Manufacturing sector specific modules

- **Manufacturing System Manager Module** - Standardise settings across different production areas within your business and across the individual modules
- **Estimating Module** - manage production for one-off jobs or non-repetitive batch production
- **Planning Module** - collate production demand and generate a list of recommendations to satisfy that demand
- **Bill of Materials (BOM) Module** – transparency across manufacturing operation into areas, including materials, labour, machines, operations, and reporting
- **Works Orders Module** – complete process modelling and management
- **Operation Times Module** - record shop floor operation times retrospectively or in real time

Experience just some of these benefits

- **Optimise business efficiency**
  Streamline your operations to retain your competitive edge
- **Customise your solution to your business needs**
  Bespoke software changeable to match your processes
- **Deliver excellent customer service**
  Connect your teams and optimise your operations
- **Connect your data**
  Bring together sales, customer service, financials, process management and the warehouse
- **Share information across your business**
  Achieve greater business efficiency by using one system
- **Analyse your business**
  Reporting, automated and delivered to your desktop to give you the business intellegence you need

With over 15 years of working with customers we have the knowledge and expertise to confidently project manage the implementation of software into your business. Our project team, install, customise, train and support you through the whole process. Your dedicated account manager ensures you are getting best value from your investment and is there to help if you ever have a query or question.
